The Palgrave Handbook of Male Psychology and Mental Health John A. Barry 2019-03-01 This Handbook represents the first concerted effort to understand male mental health in a way that facilitates a positive step forward in both theory and treatment. An alarming number of men experience serious mental health issues, as demonstrated by high rates of suicide and violent offending. Despite these problems, the study of male psychology has either been overlooked, or viewed as a problem of defective masculinity. This handbook brings together experts from across the world to discuss men’s mental health, from prenatal development, through childhood, adolescence, and fatherhood. Men and masculinity are explored from multiple perspectives including evolutionary, cross-cultural, cognitive, biological, developmental, and existential viewpoints, with a focus on practical suggestions and demonstrations of successful clinical work with men. Throughout, chapters question existing models of understanding and treating men’s mental health and explore new approaches, theories and interventions. This definitive handbook encapsulates a new wave of positive theory and practice in the field of male psychology and will be of great value to professionals, academics, and those working with males through the lifespan in any sector related to male mental health and wellbeing.

Becoming a Social Worker Vivienne E. Cree 2022-06-01 This fully revised new edition of Becoming a Social Worker is made up of entirely new stories. Providing a ‘glocal’ frame of reference, the book describes the personal and professional narratives of a diverse range of people working in social work in the UK, what brought them into the field and what has kept them in it ever since. The lively accounts reveal what it is like to be a social worker in a range of practice settings today and, at the same time, demonstrate that commitment and passion remain at the heart of social work. Some contributors will be recognised as people who have played a key part in shaping social work over the years; they provide insights into how the profession has developed over time. Other contributors, less well known but no less interesting, give a vivid account of the ongoing challenges that social work education and practice face, and the values that underpin social work. Social work is a demanding and difficult job that goes largely unseen within society. We only ever hear about social work and social workers when something goes wrong and a vulnerable adult or child is hurt. Becoming a Social Worker sets out to change that – to make social work visible, so that those considering a career in the caring professions across the world can make an informed choice about whether social work is the career for them. It is relevant for all induction courses at the beginning and prior to coming on social work programmes including all relevant HNC and HND courses as well as preparation for practice courses on all undergraduate and postgraduate social work programmes.

Cult of the Dead Cow Joseph Menn 2019-06-04 The shocking untold story of the elite secret society of hackers fighting to protect our privacy, our freedom -- even democracy itself Cult of the Dead Cow is the tale of the oldest, most respected, and most famous American hacking group of all time. Though until now it has remained mostly anonymous, its members invented the concept of hacktivism, released the top tool for testing password security, and created what was for years the best technique for controlling computers from afar, forcing giant companies to work harder to protect customers. They contributed to the development of Tor, the most important privacy tool on the net, and helped build cyberweapons that advanced US security without injuring anyone. With its origins in the earliest days of the Internet, the cDc is full of oddball characters -- activists, artists, even future politicians. Many of these hackers have become top executives and advisors walking the corridors of power in Washington and Silicon Valley. The most famous is former Texas Congressman and current presidential candidate Beto O'Rourke, whose time in the cDc set him up to found a tech business, launch an alternative publication in El Paso, and make long-shot bets on unconventional campaigns. Today, the group and its followers are battling electoral misinformation, making personal data safer, and battling to keep technology a force for good instead of for surveillance and oppression. Cult of the Dead Cow shows how governments, corporations, and criminals came to hold immense power over individuals and how we can fight back against them.

Literary Festivals and Contemporary Book Culture Millicent Weber 2018-04-09 There has been a proliferation of literary festivals in recent decades, with more than 450 held annually in the UK and Australia alone. These festivals operate as tastemakers shaping cultural consumption; as instantiations, representations, and celebrations of literary communities; and as cultural products in their own right. As such they strongly influence how literary culture is produced, circulates and is experienced by readers in the twenty-first century. This book explores how audiences engage with literary festivals, and analyses these festivals’ relationship to local and digital literary communities, to the creative industries focus of contemporary cultural policy, and to the broader literary field. The relationship between literary festivals and these configuring forces is illustrated with in-depth case studies of the Edinburgh International Book Festival, the Port Eliot Festival, the Melbourne Writers Festival, the Emerging Writers’ Festival, and the Clunes Booktown Festival. Building on interviews with audiences and staff, contextualised by a large-scale online survey of literary festival audiences from around the world, this book investigates these festivals’ social, cultural, commercial, and political operation. In doing so, this book critically offers scholarly investigation of literary festivals with respect to the complex and contested terrain of contemporary book culture.

Cultural Change in East-Central European and Eurasian Spaces Susan C. Pearce 2021-03-05 This book weaves together research on cultural change in Central Europe and Eurasia: notably, Bosnia and Herzegovina, Kazakhstan, Latvia, Poland, Russia, and Ukraine. Examining massive cultural shifts in erstwhile state-communist nations since 1989, the authors analyze how the region is moving in both freeing and restrictive directions. They map out these directions in such arenas as LGBTQ protest cultures, new Russian fiction, Polish memory of Jewish heritage, ethnic nationalisms, revival of minority cultures, and loss of state support for museums. From a comparison of gender constructions in 30 national constitutions to an exploration of a cross-national artistic collaborative, this insightful book illuminates how the region’s denizens are swimming in changing tides of transnational cultures, resulting in new hybridities and innovations. Arguing for a decolonization of the region and for the significance of culture, the book appeals to a wide, interdisciplinary readership interested in cultural change, post-communist societies, and globalization.

10 Secrets for Raising Innovative Children Stephen Di Biase 2015-04-01 “10 Secrets for Raising Innovative Children” describes what parents can do to help their children build upon their natural tendencies to be innovative while offering a buffer to the potential damage they’ll experience when they begin their formal education at age 5. There is significant evidence that from age 5 to age 20 the typical person experiencing the traditional US educational system will lose almost all of their capabilities for being innovative.

The Unconscious in Social and Political Life David Morgan 2019-07-14 Traumatic events happen in every age, yet there is a particularly cataclysmic feeling to our own epoch that is so attractive to some and so terrifying to others. The terrible events of September 11th 2001 still resonate and the repercussions continue to this day: the desperation of immigrants fleeing terror, the uncertainty of Brexit, Donald Trump in the White House, the rise of the alt-right and hard left, increasing fundamentalism, and terror groups intent on causing destruction to the Western way of life. If that were not enough, we also have to grapple with the enormity of climate change and the charge that if we do not act now, it will be too late. Is it any wonder many are left overwhelmed by the events they see on the news? Galvanised by the events outside of his consulting room, in 2015, David Morgan began The Political Mind seminars at the British Psychoanalytical Society and their successful run continues today. A series of superlative seminars, mostly presented by colleagues from the British Society plus a few select external experts, that examine a dazzling array of relevant topics to provide a psychoanalytic understanding of just what is going on in our world. This book is the first in The Political Mind series to bring these seminars to a wider audience. The Unconscious in Political and Social Life contains compelling contributions from Christopher Bollas, Michael Rustin, Jonathan Sklar, David Bell, Philip Stokoe, Roger Kennedy, David Morgan, M. Fakhry Davids, Ruth McCall, R. D. Hinselwood, René Danziger, Josh Cohen, Sally Weinrobe, and Margot Waddell. They investigate so many vital issues affecting us today: the evolution of democracy, right-wing populism, prejudice, the rise of the far right, attitudes to refugees and migrants, neoliberalism, fundamentalism, terrorism, the Palestine-Israel situation, political change, feminism, austerity in the UK, financial globalisation, and climate change. This book needs to be read by all who are concerned by the state of the world today. Psychoanalysis and psychoanalysts with their awareness of what motivates human beings bring clarity and fresh insight to these matters. A deeper understanding of humanity awaits the reader of The Unconscious in Political and Social Life.

ASIAN Countries’ Strategies towards the European Union in an Inter-regionalist Context Wai Ting[Michito Tsuruoka[Si Hong Kim]] 2015-02-09 This is the first book on Asian countries’ strategies towards the EU. Since the introduction of Common Foreign and Security Policy in 1993 and the publication of the EU’s first strategic document on Asia one year later, hundreds of books and journal articles have been dedicated to the study of the EU policies towards Asia as a whole, or to individual Asian countries. However, very few of these researchers ever intended to explore the strategies of Asian countries, and Asian leaders’ mindsets, vis-à-vis the EU. Quite often, the policies of Asian countries towards the EU were simply interpreted as responses to the EU’s actions in Asia. Having been passive players for decades, Asian countries are now increasingly willing to participate in the formulation of regional and global orders, for which they need to articulate their own strategies and the world needs to better understand their mindsets. In the past two years, in the framework of EU Centres in Asia-Pacific, some top Asian scholars on EU-Asian relations were brought together to debate the strategies of individual Asian countries towards the EU, and evaluate the EU’s actions in the region. In their eyes, the EU was interpreted as a normative power, a security player, a civilian promoter and a health-care supplier. Together, they aimed to establish some common rules for explaining Asian countries’ strategies towards the EU after in-depth study of the actions of individual countries in their bilateral relations with the EU. This book is therefore indispensable to any efforts to understand Asian leaders’ mindset in the EU-Asian relations and their strategies towards the EU in the twenty-first century.

Manifesto for a Moral Revolution Jacqueline Novogratz 2020-05-05 "An instant classic." —Arianna Huffington "Will inspire people from across the political spectrum." —Jonathan Haidt Longlisted for the Porchlight Business Book of the Year Award, an essential shortlist of leadership ideas for anyone who wants to do good in this world, from Jacqueline Novogratz, author of the New York Times bestseller The Blue Sweater and founder and CEO of Acumen. In 2001, when Jacqueline Novogratz founded Acumen, a global community of socially and environmentally responsible partners dedicated to changing the way the world tackles poverty, few had heard of impact investing—Acumen’s practice of “doing well by doing good.” Nineteen years later, there’s been a seismic shift in how corporate boards and other stakeholders evaluate businesses: impact investment is not only morally defensible but now also economically advantageous, even necessary. Still, it isn’t easy to reach a success that includes profits as well as mutually favorable relationships with workers and the communities in which they live. So how can today’s leaders, who often kick off their enterprises with high hopes and short timetables, navigate the challenges of poverty and war, of egos and impatience, which have stymied generations of investors who came before? Drawing on inspiring stories from change-makers around the world and on memories of her own most difficult experiences, Jacqueline divulges the most common leadership mistakes and the mind-sets needed to rise above them. The culmination of thirty years of work developing sustainable solutions for the problems of the poor, Manifesto for a Moral Revolution offers the perspectives necessary for all those—whether ascending the corporate ladder or bringing solar light to rural villages—who seek to leave this world better off than they found it.

Team-Based Oncology Care: The Pivotal Role of Oncology Navigation Lillie D. Shockney 2018-04-10 This book discusses how effective navigation requires a team approach to oncology care and should never be considered an “add-on” resource or service. This comprehensive book also provides insights into applying the information presented to the real world of oncology care.

Social Security Works! Nancy Altman 2015-01-21 A growing chorus of prominent voices in Congress and elsewhere are calling for the expansion of our Social Security system—people who know that Social Security will not “go broke” and does not add a penny to the national debt. Social Security Works! will amplify these voices and offer a powerful antidote to the three-decade-long, billionaire-funded campaign to make us believe that this vital institution is destined to collapse. It isn’t. From the Silent Generation to Baby Boomers, from Generation X to Millennials and Generation Z, we all have a stake in understanding the real story about Social Security. Critical to addressing the looming retirement crisis that will affect two- thirds of today’s workers, Social Security is a powerful program that can help stop the collapse of the middle class, lessen the pressure squeezing families from all directions, and help end the upward redistribution of wealth that has resulted in perilous levels of inequality. All Americans deserve to have dignified retirement years as well as an umbrella to protect them and their families in the event of disability or premature death. Sure to be a game-changer, Social Security Works! cogently presents the issues and sets forth both an agenda and a political strategy that will benefit us all. At stake are our values and the kind of country we want for ourselves and for those that follow.

ICT Management in Non-Profit Organizations Ariza-Montes, José Antonio 2014-04-30 The instability of today's economic climate calls for non-profit organizations to approach social problems in new and interesting ways, and Information and Communication Technologies may serve as an answer to this call. ICT Management in Non-Profit Organizations aims to explore the effective and comprehensive deployment of appropriate ICT strategies within the nonprofit sector. This innovative reference work will discuss how ICT enables the non-profit sector to achieve organizational efficiency, effectiveness, and, ultimately, self sufficiency, and will provide elected and appointed policymakers, managers, and planners in governments, public agencies, and nonprofit organizations with a comprehensive strategy for creating an ICT management agenda in the non-profit sector.

The Girl at the Baggage Claim Gish Jen 2017-02-28 A provocative and important study of the different ideas Easterners and Westerners have about the self and society and what this means for current debates in art, education,

geopolitics, and business. Never have East and West come as close as they are today, yet we are still baffled by one another. Is our mantra "To thine own self be true"? Or do we believe we belong to something larger than ourselves—a family, a religion, a troop—that claims our first allegiance? Gish Jen—drawing on a treasure trove of stories and personal anecdotes, as well as cutting-edge research in cultural psychology—reveals how this difference shapes what we perceive and remember, what we say and do and make—how it shapes everything from our ideas about copying and talking in class to the difference between Apple and Alibaba. As engaging as it is illuminating, this is a book that stands to profoundly enrich our understanding of ourselves and of our world.
